the men who surrounded him at this time: Manuel Palafox (later banished as a traitor), Antonio Diaz Soto y Gama (who called himself an anarchist but said that the five greatest men in history were Buddha, Jesus Christ, St. Francis, Karl Marx and Emiliano Zapata, a mixed bunch to say the least), Genovevo de la O (a revolutionary leader who threw in his lot with the Zapatistas), Amador Salazar and Zapata's broher, Eufemio (who, according to this book was shot by another Zapatista when he went off the rails).

Zapata himself said of these men that they took orders from him only because they had a feeling of friendship for him. To the press in Mexico City these men were rubbish (unless they happened to be in Mexico City at the time). Huerta believed that the whole of the countryside was entirely Zapatista and the only way to stamp this out was the mass deportation of thousands of innocent people and the burning of their homes. This was only really brought to an end by the American landing in Vera Cruz when these sadistic and murderous army officers and their men were forced to leave the country to face the new menace.

#### 'A Strong People'

The anarchists say that the land should be owned in common by those who work it and the Mexican Indian had this as his normal way of life. In fact he found it difficult, if not impossible, to understand the theory of ownership of land at all. To own the land was like owning the air, it was for everyone to grow his crops on to feed his wife and family. Zapata has been called a communist but he was never that because he did not seek the conquest of the state. He was a communist in the sense that he believed that the land should be held in common but so did lots of groups of people long before there was any idea of socialism or communism or anarchism. He was a practical anarchist, a man who came to anarchism not from choice but from necessity. He learned from bitter experience that 'God helps those who help themselves'.

He tried trusting the well-educated and well-spoken men first, the men who had been to school and trained to talk. They failed him as they fail everyone, because when it comes down to it they are only exercising their minds when they talk of the

FREEDOM Weekly - Is. ANARCHY Monthly - 3s. [inc. post.]

MILIANO ZAPATA was born in the hamlet of San Miguel Anenecuilo, near the village of Ayala in the state of Morelos If this had not happened the story would have been quite at the time when Don Porfirio Diaz was the self-elected ruler of Mexico.

The village lay near the Hacienda of Chinameca where powerful landowners lived. Every year this Hacienda swallowed up a army, or be shot. They joined the army. They spent ten years little more of the common lands that the villagers had held ever since anyone could remember, the common lands on which the mass let-outs they sometimes have in Latin countries to celebrate common people, Indians like Emiliano, grew their crops.

The land was good land, rich land, and the sugar planters needed it to grow their crops too. There was water there and sugar needs plenty of water, so, it was necessary to get the Indians off. Not all at once, but a little at a time, so that they wouldn't notice it quite so much.

When this was accomplished the Indian would have no land, no work, no food for his wife and children. But the rich landowners could find him plenty of work on their plantations. Wages? Well as there wasn't any other work the Indian would be glad to have a job at all. So he would work for just his keep, but not too much keep, or he would get lazy and not work as hard as he should. The Indian would never work for the sugar planter if he had his own land so they stole his land and shot him if he protested, and that, as they say, was that.

After a time all of the land in Morelos was owned by eleven very rich families most of whom lived in Mexico City. The simple country people believing in justice (for had they not had a revolution in the days of Benito Juarez for land and freedom?) decided to send a delegation to the big city to see Don Porfirio (who was himself an Indian, and had fought with Juarez the great liberator). He would understand their problems and the law would make the rich men give back the land that they had stolen.

But when they arrived at the Presidential Palace who should be there with Don Porfirio? Why, those very rich men who had stolen the land. The villagers told Don Porfirio of their problem and he listened intently. Then he told them that he would see about it. They must go back to their village and the law would take its course, it would take time, but they must be patient. So they went back to the village and they waited and waited and waited, but nothing happened. After a very long wait they decided to hire lawyers and though this was very expensive they put what little they had together to pay the fees. The lawyers took their money but they never got the land, all they got was promises. So the Indians were finally left with no land and no money, and no one who would speak for them, and they went to work on the plantations for their keep.

Cutting sugar-cane is hard work, and the hours were long, and the Indians were not helped by the fact that they were living on a starvation diet of tortillas and beans. The Indians tended to die prematurely, and, when a man lay dying he would tell his sons, 'You must get the land back'.

Young Emiliano probably started to work on the Hacienda too, but at an early age he and his brother, Eufemio, decided They went up into the hills, where they probably took to that this life was not for them. They stole guns and became banditry again and, by 1911, when the real rising began, they highwaymen, spending their time relieving the rich of their had quite a large group under their command. This rising was valuables instead of adding to them.

Just after Emiliano came out of the army things began to happen on the political scene in Mexico. For the first time since Don Porfirio had come to power there were to be opposition parties at the elections. The liberals (who were very progressive in those days) put up a candidate in Morelos. But he didn't get in, in spite of the fact that most of the people had voted for him. Probably some of the votes got lost during the count. After the election those who had worked for the liberal had to leave town, as they say, in a hurry, and along with some others, went the two brothers.

Madero was of the upper class and did not understand the common people. He believed in things like the freedom of the press and democratic elections, but the people just wanted the land.

Before Madero became President, Zapata, with others, drew As Zapata once said, 'What is the good of the press being up a kind of charter. Villa was in control of the northern part enemies were all about him. Morelos had been free since 1911 of the country. Neither Zapata or Villa ever seemed to want to be the President of Mexico but their man (Gutierez) certainly did.

After a time however he changed sides and became Carranza's man and the seemingly endless chaos started all over again. It was 1918 and General Gonzalez sent a force under the command of Colonel Jesus Guajardo to take a certain town near Carranza marched on Mexico City with thirty thousand men, Obregon, who had come to some agreement with him, with ten the 'zapatistas' base. The Indians were looked upon as being animals by those who thought they were their betters and treated like animals too. They replied in kind and for years the country was torn to pieces by the opposing factions. Zapata and his Zapatistas were only a small part of this whole and the book dealing as it does with the entire revolution discloses very little of what motivated the agrarian rebels. It is a book about the political side and the romantic side but compared to the second book on the subject . . . Zapata and the Mexican Revolution, it is a schoolboys' guide.

The author has appeared to have done his homework on most of the books that have been written on the subject in English, but for someone who is looking to find out something fresh about this complex subject the book has very little to offer. It is quite well written from the point of view of being very easy to read, in fact I read it very quickly. But it says little or nothing that has not been said before. In reading this book one has the thought that almost anyone with a middling knowledge of the subject This is easily the finest book that has been written in English

The Zapatistas were usually behind the times, politically The main trouble about Revolution Mexico is that the author speaking, because they had little idea of what was going on up seems to fall into the same trap as so many others who have north.
