

WAR\_\_\_WHAT FOR?

A paragraph appearing in a sunday paper announces the fact the ex-servicemen's organisation in the United States are claiming a pension of £120 a year for all men who served in the army, whether at home or abroad. This is being supported by all parties. Surely we live in a queer world. Our politicins are more concerned in fleecing us further than in supporting even the modest demand for the difference between 1s. 2d. & 6/- paid to the "Aussies." Never mind, we may have a change of opinion soon.

Men who have applied for a job as the result of an advertisement which read "Only ex-service need apply" have received a rude shock This applies to one of the govern ment offices where a number of ex-service men were started as clerks at the unmentionable wage of 50s, In one of the Lancashire sections there are some 400 of these men employed, men who during the war were paid Is, 2d. a day, and now the war is won and over they are expected to be satisfied to work for a sum of 50s, with food increased in cost 146 per cent. Surely this is another call to exservice men, join a real live organisation and help to break capital-1sm In spite of the protests and the deputations that have waited upon members of the government. numbers of ex-service men are still shut up in asylums, The word scandal is not strong enough to apply to the treatment that these shell-shocked heroes are being given by a grateful government. Not only are these men suffering from

The Attorney General for stated a few days ago in the HOUSE at Westminster tl government had received a from the Ulster ex-service association to place at its o 3,000 trained officers and m he said the offer was being ca considered.

Now you have it straight have been told what might if you joined any of these organisations. If ever a arises in England similar one in Ireland, you who are bers of the Comrades, Fede and associations, etc. may be ged to fight against your workmates and your own cl: Study this over in your min you will realise how easy yo made yourselves tools of the italist class The Minister of Labour is in a position to say that in patriotic country there are 16,556 employers who are to employ their quota of 5 pc disabled men. He then goes say that he "wants more, more, and Ireally must have Most of the government d mentsare supposed to be fre this accusation that they have taken their share, which n true, but are they free from charge that they are paying men a sweated wage? That of course is another que and one which the govern might attempt to answer.

shell-shock but some of them are suffering as a result of being wounded in the head, and in one case which has come to my knowledge they have dealt with the man's family in the dirtiest of fashions This man was wounded in the head and sent home. After a time he was discharged without a pension, and some time afterwards his mind became slightly unhinged, and he appealed for a medical board. This was given to him, and he was certified insane and sent to a local asylum, where he is at present, Mark this: The board declared it had not been caused by the war and therefore he would have no pension, but would have to go to an asylum. He went, and his wife and children are now living on Poor-law relief and charity. This is only one case of several thousands.

Why leave the education of your offspring in the hands of your enemy Are you prepared to stop it, if so send your boys and girls to The Young Labour League, every sunday at 3 p.m. William Morris Institute, 1 St. James St. Come yourself and bring others with you, help in the greatest work of the time, dont talk about it, get down and do something for the future working class.

Municipal Finance and the Worker.

The constitution and powers of municipalities, and all local governing bodies, are to all intents and purposes capitalistic institutions as they exist today. The limited powers confered on them by parliament, and the way their liberty of action is hedged round by legal restrictions, are all intended that their a iministration shall conform as closely as possible to the private capitalistic practices by which they are surronnded. Hende we see an inefficiency constantly attending their labours, from their inception until now, an inefficiency that is rapidly reaching a stage when it will be a positive menace to the community. This menace is a continous growing debt, and the growing interest burdne which such debt entails. Now every simpleton knows that with the development of education and other social amonities the people will continually cry aloud for im , annually over £150.000 to pay the proved conditions which it is the duty of the municipal council to provide. Given a desire on the part of our council to keep pace with the public demands in this direction they are handicapped by the fact that such improvements are costly, and their only means of meeting them is to make continuous calls for increased rates, or carry them out by means of borrowed money, The value of such revenue producing sources as they at present possess are minimised very largely by the fact, that very much of their surplus revenue which shon'd form a neuclus fund for further improvments, have at present to be employed in meeting the interest bearing deminds on expenditure of a non-lucrative character. It is this large volume of expenditure on improvements that bring in no return, with their heavy interest charges, that keep so many necessary improvements back and cause the rates to continually rise. Detailed examples of some of these I will give later on.

of the people. This exploitation shows itself in the huge debts local governning bodies are bound to contract under conditions laid down by the private capitalist. Take our city debt as a case in point, we have a debt of over £5,000,000 which seems to remain practically stationary althou -gh the rates continue to rise. Over £3.000 000 of this debtisirredeemable stock, that is to say, it can only be paid off by consent of the stock holders, and at the price they choose to sell out at. So if they wish tokeep us in bondage this debt would stand, as it now is, until Doomsday, only a special act of parliament could alterit. £3.000,000 of stock at 3 per cent means an interest charge on the ratepayers of no less than £90,000 every year, the other £2.000,000 debt at the same rate of interest means a further charge of £60,000 every year. so the ratepayers have to provide interest on these loans. To add insult to injury our accounts show that over £384,000 of this debt is not a real debt at all since no money has been paid, but it is a gratuity given to the stock holders in the form of discount on their stock. In other words we are paying interest on £384,000 which we have never had, and when this debt is finally paid we shall, in addition to the yearly interest already paid, make them a present of £384.000 for nothing, now seeing much of this debt dates back 40 to 60 years it follows that we have paid nearly 200 per cent in interest on the amounts origanally received, and on that which we never received, and still the the debt of 51 millions remains with us as powerful to exact its unjust toll as ever. Is there any wonder that our municipal affairs go from bad to worse under condi-. tions like these, could it be otherwise. That our affairs are in an unsatisfactory state was shown by the refusal of the ministry of health to grant an extension of the borough. 10,000 insanitary houses, 5,000 pail closets, our population densely crowded, no adequate housing provision for the people, and no signs of such in the near future. All this comes of the anti social restrictions put by capitalism on local govern-

ment, coupled with the anti con unistic conceptions of those hithe responsible for its management. The prospective rate of 17/- in tl is begining to make the middle cl squirm, They have been used the tools of the financial magne to oppose the workers until th have nearly dug their own gra Their only salvation lies in th linking up with the workers a fighting jointly to destroy th common enemy. The great ene of both are the people who cont our finances as applied to indust. Our heavy national and municip debts, and the enormous amount interest wrung from the peop yearly, is done on the assumpti that our creditors transfer somethi to us called capital, possessing intrinsic value without which could not carry on. This is, as I sh show later on, the greatest bog possible, and is only used to bli us in an ever intensified degree, Good municipal government. fi from debt, and on a very low rate, not difficult given the freedom employ sound financial mear
