The British worker as a result of five years of Labour Party collaboration with capitalism and the American war camp, has had his weekly pork chop reduced to half a pork chop, and he has been saddled with endless red tape in order to get that. Nye Bevan has Britain's tie-up with the Western Boc, but at the same time does not make a sharp issue of the matter and suggests to the worker that he should rely on action in Parliament to better his situation.

German industry has been gettin back on its feet, but a new burden of arms will steal any benefits which the German worker and his family might hope from it.

The dictatorship of General Franco and his cronies was threatened for a time by widespread strikes of courageous Spanish workers. Franco, however, has been given a new lease on life through the support of the United States government. The condition of working people in all of Asia and Africa is demoralising when considered in terms of sheer hunger and misery. But there is a boiling force demanding recognition in these areas, which is undoubtedly one of the brightest notes on the labour scene this May Day. It is the force of workers liberating themselves from feudalism led a sort of verbal challenge to and colonialism as best they know how. In some cases the force has been sidetracked in the direction of nationalism (as in North Africa), has been corroded into Stalinist channels in China, but in much of the area, notably India, there has been a healthy tendency away from the influence of either state or private exploitation.

Two months ago five workers of the C.N.T. (Spanish section of the I.W.M.A.) were "legally" murdered in Barcelona for their activities against the regime.

The representatives of the Spanish Catholic Church offered their holy offices to the condemned menwho refused them-a few hours before the executions. The rifle and the cross made common cause at that tragic moment.

But this was nothing new in Spain where, for 13 years, murder has become a system, with the "blessing" of the representatives of Christ, servants of Franco and his crimes.

Franco has allocated 72,000.000 pesetas (about £1,000,000) to take care of the Congress expenses. Of this sum, 30 per cent is dedicated to the police force who, for some weeks, have been busy in Barcelona. All anti-fascists who are at conditional liberty must report daily to the police station. Apart from that, it is estimated that there have been more than 10,000 arrests-and

One question is of fundamental interest to us as workers. Can In Great Britain and Western State ownership of the means of production and distribution function in our interests? Can it help achieve a real Socialist society?

The experiences of the capitalis class with regard to the problems o control and ownership have something to teach us. They have found that the two functions cannot b divided. Collective ownership of a particu lar factory by the workers who work in it can be combined with the control of that factory at one and the same time.

Co-operation on a national and international scale, between the various factories and other work places brings no one-other than the workers concerned-into the business of controlling the economy.

The position is, in fact, similar to that of a strike committee, composed of workers in a particular factory. co-operating with other such committees in a nation-wide strike.

The printed "D.A.," which replaces the duplicated bulletinorgan of our Federation during its "teething" period-has been made possible by the solidarity of Swedish, Spanish, Jewish and American comrades.

We take this opportunity of thanking these fellow-workers for the help they have given us, and of assuring them that one of the first principles of our paper will be to give expression to the international solidarily of the working-class.

Our thanks, too, to the comrades in this country, whose efforts helped us pass the financial target we set last year.

We hope that this first issue will not disappoint you. If you don't like the material we publish, write and tell us why. If you have suggestions to improve the paper, let us have them, too.

And most important, let us have information of any militant activity that is taking place in your area, or in which you, personally, are the suffering it has brought on them, involved. Don't bother about literary siyle . . . we just want the essential facts.

One criticism we shan't take to heart is a beef that something that happened in your district has not been reported or commented on by us. If you haven't given us the raw material, then you'll be the one to blame.

This paper will be open at all times to workers involved in genuine disputes with the employers.

And while we're on this subject, let us make it perfectly clear that we have no connection whatsoever with the Communist Party or any of its undercover groupings.

We Syndicalists consider the Communist Party and its international ramifications as one of the greatest menaces the working-class have to face.

Once Stalinism, or its offspring Titoism, gain control of the State machine, any hope of independent organisation by the workers goes out of the window. #### Over military age

There are differing opinions among the German people, but the vast majority do not seem to want a rebirth of militarism. Considering that's hardly surprising.

Main opposition comes from the youth of the country. A German social democrat recently remarked: Nearly all those who campaign for rearmament and a German army have passed the age of military service, from 20 to 40."

Rearmament is, of course, favoured by West German capitalists, who openly speculate about the huge profits to be made in the arms industry, and it can count on financial aid from the United States.

THE SYNDICALIST WORKERS' FEDERATION seeks to establish a free society, which will render impossible the growth of a privileged class and the exploitation of man by man. The S.W.I] therefore advocates common ownership and workers' control of the land, industry and all means of production and distribution, on the basis of voluntary co-operation. In such a society, the wage system, finance and money shall be abolished and goods produced and distributed not for profit, but according to human needs.

CLASS STRUGGLE. The interests of the working class and the ruling class are directly opposed. The S.W.F. is based upon the inevitable day-to-day struggle of the workers against those who own and control the means of production and distribution, and will con- and after the Congress the fascists tinue that struggle until common ownership and workers' control are and Catholics are trying, and will achieved.

DIRECT ACTION. Victory in the fight against class domination can only be achieved by the direct action of the workers themselves. The S.W.F. rejects all parliamentary and similar activity as deflecting the workers from the class struggle into paths of class collaboration.

THE STATE. The State in all its forms is the enemy of the workers, and cannot exist within a classless society. The S.W.F. does not, I therefore, hope to use the State to achieve the emancipation of the working class; it does not seek to obtain seats in the Cabinet or Parliament. Nor does it desire to build a new State on the ruins of the old. Any attempt, by an allegedly working class party, to create a new State, can only result in a new ruling class.

ORGANISATION. To achieve these aims, the workers must organise. They must replace the hundreds of craft and general trade unions by syndicalist industrial unions. As an immediate step to that end, the S.W.F. aids the formation of workers' committees in all factories, mines, offices, shipyards, mills and other places of work, and their development into industrial unions, federated to an all-national Federation of Labour.

INTERNATIONALISM. The S.W.F., as a section of the Intertion with the West in rebuilding a I national Working Men's Association, stands firm for international
