Dear Ken,

I have been asked
by Brian to forward the enclosed
article to you.

Thanks for your reply to my
request for more information on the
S.W.F. I shall need more time
to settle in my own mind whether
to join or not. This is not because
I do not believe that the Anarchist
philosophy is the only rational
way of living but because I
feel that the take over of industry

must be accompanied by a definite running down of large scale industry which tends to tie us to machines which must be our servants not our masters.

I am writing a dissertation next year on "Workers Control" for my Dip. Tech (I am a Sandwich Course student) and any recommendations for literature would be very much appreciated.

May I say that I find Direct Action an up to date, useful paper and certainly more in touch with life than any other Anarchist literature I subscribe to.

Yours Fraternally
Les. May.
