

all

7th October 1963.

Dear Ken,

Enclosed find article for DA. If you don't like the first part leave it out. I was forced to listen to this bullshit about performance centered management for six weeks in order to get a course towards my degree. I could not convince the Professor of the error of his ways but I hope that I at least managed to raise doubts in the minds of some of the class. Anyway my little tirade gets some of it out of my system.

I wrote to the group in Montreal but have so far had no word from them, I suggested they consider a bi-lingual paper. This could then circulate right across Canada and not be confined to the French speaking alone.

I am taking a course in Philosophy this winter (again towards my degree) and the lecturer is Dr. Colwyn Williamson of the U of Alberta. He came out from England a couple of years ago where he was active in the Committee of 100. He knows Laurens Otter so ask Laurens if he remembers him. He calls himself a Trotskyist fellow traveller and thinks anarchists are impractical dreamers.

We have been having land lord trouble here. We rented this house on the understanding that it was not to be sold; then after we had been in it for only a week it was sold over our heads. The real estate people wanted us out by the end of September but they slipped up by only giving me verbal notice so I had the pleasure of telling them I had no intention of moving until the end of October. That really hurt their feelings. Anyway our address from the 1st of November will be 16 Stewart Street, Red Deer, Alberta.

I am enclosing a picture of myself taken in the school where I am teaching which you may find interesting.

B J L.
