

FIGHTING FASCISM

WHAT IS FASCISM ?

Fascism is an extreme Right Wing Political Movement. Fascists believe in Nationalism, Militarism, and the supremacy of a ruling elite which is characterised by a dictator. With Fascism comes suppression of individual freedom, Racism and intolerance and hatred of all non fascist beliefs and actions; and eventually mass murder of all those groups and individuals, who dont fit in, or wont bow down to the fascist ideology.

WHO ARE THE FASCISTS ?

In Britain there are two main fascist organisations, the British National Party and the National Front. At present they are relatively small but growing quickly, they hold regular rallies and meetings throughout the country.

WHY TAKE ACTION ?

Fascism is growing throughout the world, British Fascists groups are making strong links with many groups abroad. Givin the right economic and social climate, fascism can rise to a extent where it can engulf a whole country or countries. Fascists get most of their popular support by stirring up emotions and providing easy, visible scapegoats (like blaming Black or Asian people for high unemployment or bad housing, while diverting attention away from the ruling class, and rich bosses, who are realy to blame for the ever increasing problems facing working class people) Action needs to be taken now, to insure that fascism never rises again, so that everyone regardless of race, colour, sexuality or belief can walk the streets without fear.

WHAT YOU CAN DO

Reject racist ignorance, prejudice and fascist ideas, and become involved in anti-fascist activities. Rip down and spray over fascist posters and graffitti. Keep yourself and A.F.A. informed of any fascist activity in your area. Attend anti-fascist rallies. Spread anti-fascist litrature and beliefs; and most importantly point out who realy is to blame for the conditions we live under; and remember Nazi Germany didnt start with concentration camps that was how it ended.
