Anarchist Communist Federation
Action Special

The spivs are winning-

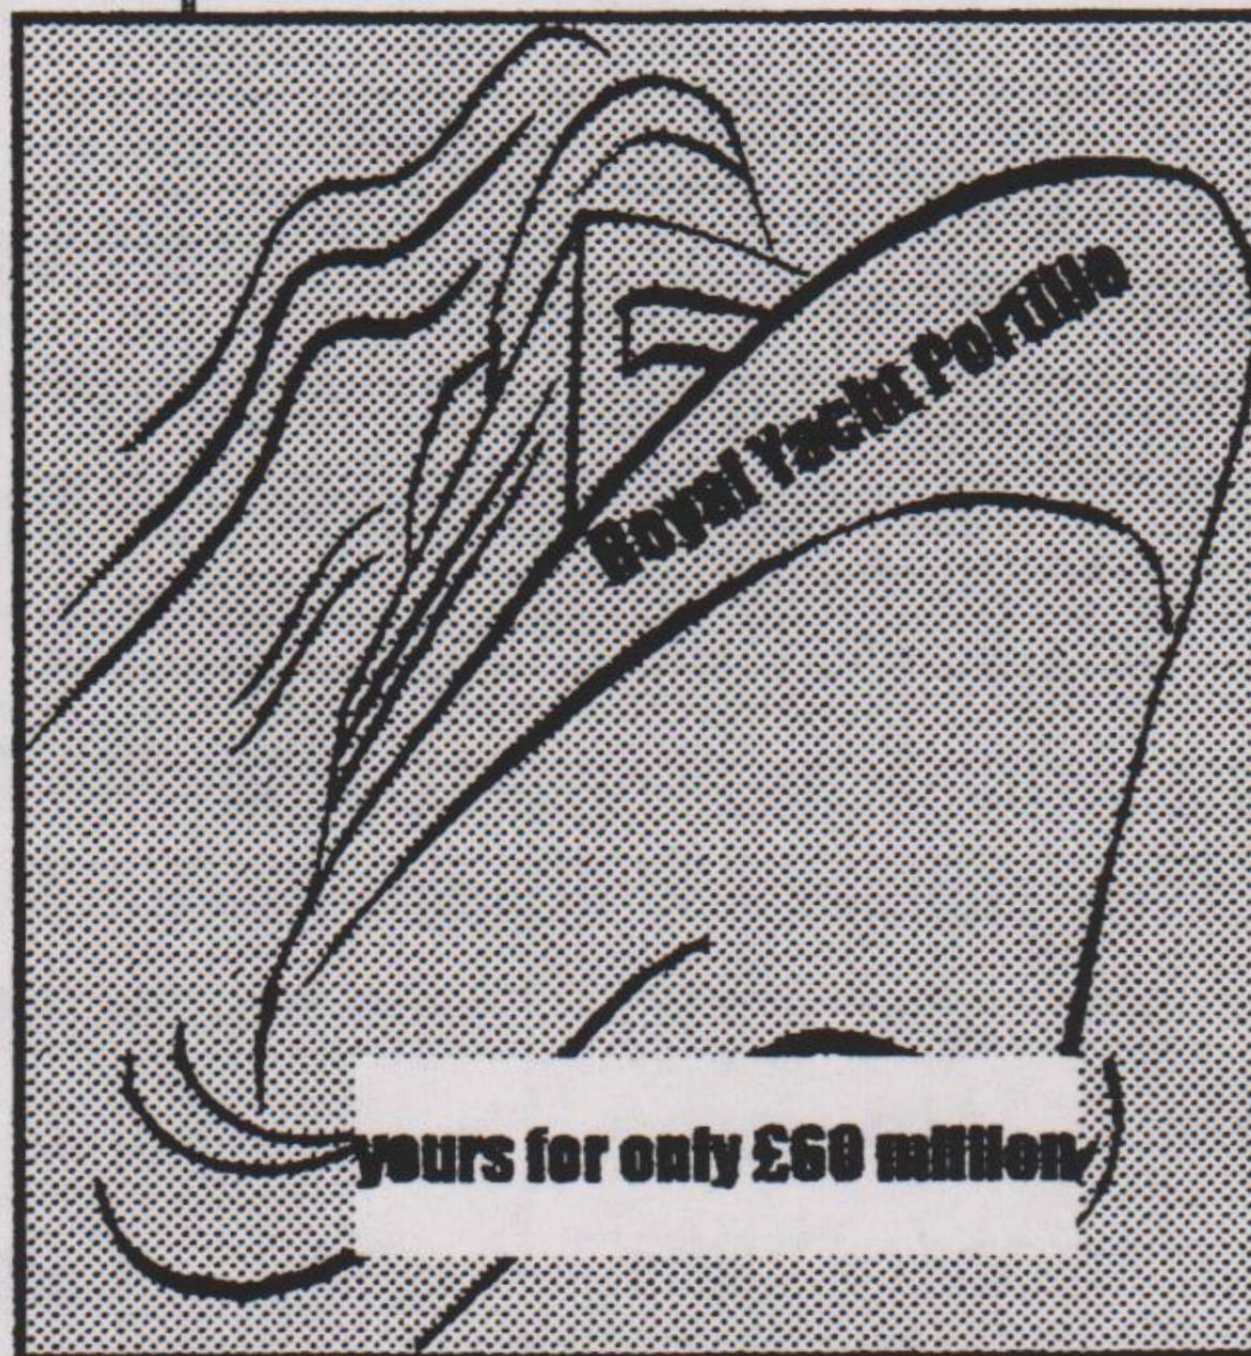

the parasites are now in control of our health care. They do not give a damn if **working class people** suffer or die- as long as they make money out of us. First the cleaning went- wages were low before privatization -now... well if you work there you know well enough. **The robots who manage our hospitals have picked off one group of workers after another-** isolated in small disputes workers feel powerless and unable to fight- **union bosses have tried to keep disputes localized** and their memberships under control so they stay sweet with management

Strikes and demonstrations need to be backed up with direct action

and can promote their own sectional interest. **NHS workers have always been the first line of defense for our health service-** the bosses reckon that the line has been broken and are now moving in to carve up the spoils.

The East End is the work shop that created the wealth of this city- now our **old folk** live or die in pain because the bosses won't release enough money to give them the care they deserve- **our children** are denied treatment that could give them a decent chance in life- workers die on trolleys in

corridors for the lack of a bed. Time to ditch the unions strategy for defeat- **There is only one battle: The fight between workers and the boss class.** Workers across the city must link up their disputes- **Rail workers- council workers- health workers post workers - the unemployed and the rest of us: We are the pissed off majority.**

Together we can make this city ungovernable!

Our interests are directly opposite to the interests of the bosses so we have nothing to gain by compromise. **Prepare for battle.**

Harriet Who?

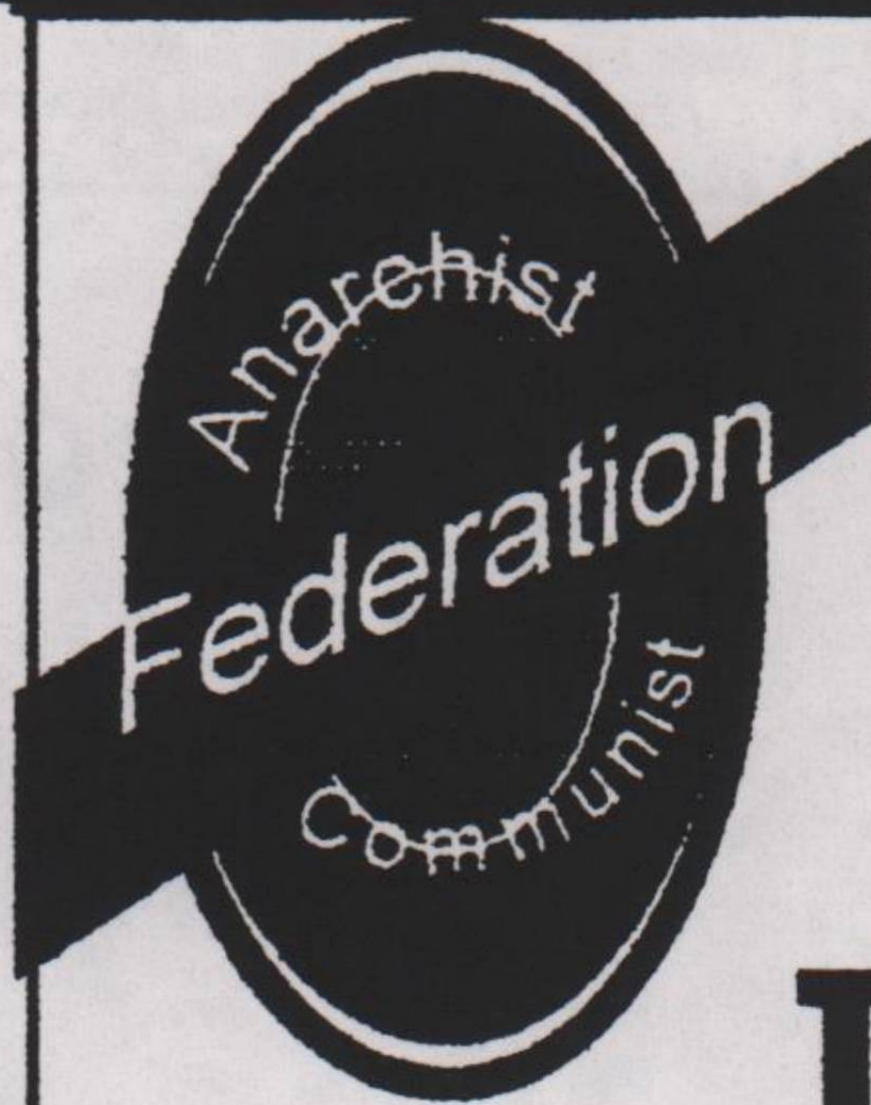

The prospect of a Labour government is no comfort. They have shown themselves to be as Tory as the Tory party- they boast in their election campaign that they will continue screwing the working class -but more efficiently.

Gordon Brown has already said he will rat on the pay review body recommendation. Soon we will be hearing Harriet Heartless and "Union Jack" Dromey justify using private health care as well as sending their kids to snob schools- Working class people aint good enough for them no more- They are in the elite now... *I'm all right Jack.....*

Who ever wins the election the working class will have to fight on.

Left wingers miss the point again!

Labourites and the left parties (Socialist Worker, Militant, Socialist Labour etc.) always come out with the same dead formula- "Make the *leaders* fight" Who are they kidding? The leaders of the unions and their Labour party cronies have no interest in fighting the bosses- They want cozy chats with management and the promise of some pay off for *their* union at the expense of other workers. The Labour Party don't give a cuss for working people- Why waste our time talking with our enemy when we should be ORGANISING against them? Millionaire's son Blair has never done a stroke of honest graft in his life and his rich wife got paid hundreds of quid an hour for prosecuting a pensioner for non-payment of the poll tax. We have nothing to say to scum like that (nothing we care to print anyway) we want to talk to our own people- working class people. The left want to replace the scum at the top with themselves- like Lenin and Stalin did in Russia- Sod that- imagine having to suck up to your SWP commissar just to get extra butter rations!

Who are the Anarchist Communist Federation?

The Anarchist Communist Federation are an organisation of people who agree with a set of aims and principles and wish to be active in the fight to transform society: we are not a party and do not seek power for our organisation. We reject authoritarian methods of organisation. We believe mutual aid and co-operation should be the basis of society- not greed and competition. We are internationalist and reject all false divisions in the working class be they national borders or racist, sexist or homophobic attitudes held by individuals or institutions. We believe that only the mass action of the working class can transform society by social revolution- we are not pacifist and believe in the right to self defense but do not support individual acts of violence as they are counter productive for the working class as a whole. We produce books, pamphlets and a magazine "Organise!" which explain our ideas and analyse and discuss current struggles and aspects of working class culture and history.

Organise! for class struggle anarchism.

News and analysis from workers

fighting back around the world.

£1.00- or free to prisoners
