MURDER

EVERY YEAR IN THE U.K. MORE THAN 800 MILLION ANIMALS ARE SLAUGHTERED FOR FOOD AND CLOTHING - WHY?

These pictures depict the cold and calculated way in which people exploit other species. The eating of animal flesh and the wearing of animal skin (and hair) is unnecessary. HUNDREDS OF MILLIONS of animals suffer and die for the sake of human greed and vanity. There are numerous alternatives available yet most people are too selfish to change their lifestyle. If you are not prepared to change the way you live, then YOU are participating in MASS-MURDER.

By adopting a vegan lifestyle you not only give up killing animals but are also following the HEALTHIEST diet possible for both yourselves and the rest of the planet.

HELP STOP THIS HORROR

MEAT

All six heads in this picture are dead – Three by murder, three by choice!!

PIGS

All pigs, from breeding sows to fattening stock, have suffered through intensification of production. A breeding sow is "served" when she's in season and when the young are due is transferred to "farrowing" quarters where she is imprisoned in one of many individual stalls. She cannot walk or turn around. The object of the pen is to protect the piglets and keep the sow in the feeding position at all times.

The piglets themselves do not escape brutality for long. Soon after birth they receive a battery of injections, their teeth are removed with pliers and their curly tails are cut off leaving them bleeding and shocked — no pain relief is given. The male pigs are castrated, again with no anaesthesia.

Whilst the mother is returned early to begin the entire cruel cycle yet again, her offspring, barely weaned and bewildered, are taken for fattening to slaughter weight.
