AZ NO 2

THE SOUND OF THINGS FALLING APART (A TV VIEW)

High unemployment is cited by most people as the main cause of our recent peak viewing entertainment. Shots of Shots, blow ups of blow ups, cuts to cuts of concerned labour MP's missing the point. The governments policies have failed they cry the figures show, the violence shows!

To a labour MP or government unemployment is a tragedy, the number one sin, a failure. Their power is built from their countries work force unemployment for it would be ritual suicide. They don't realize the Tories see it as something else. High unemployment is a weapon, a cruise missile to blitz the heart of the opposition, a club to pound until death or submission.

Consider, a big vote catcher in the greedy south was the Tory pledge to weather the unions "No more winter of discontent". Well they've fulfilled that pledge through the club. The TUC expects to lose $\frac{1}{2}$ million members this year and 1 million by 1982 through unemployment. Their power to defend their members from state intervention (previously a Tory swear word) is crippled. One less obstacle in setting back the clock. That's real power, what Stalin lusted over in fact. Even the Labour party will be affected, losing £100 000 in affiliation fees this year.

This weapon is a means to regain power to the employer and the speculator.

A return to the thirties caps in hand its the boss (more likely now the multi national). The government can the merge back to where it came, the very employers themselves! Labour is conscious of a move to the thirties but has not yet realized it is deliberate.

So the riots must have shaken the Tories to the core. Right to Work Marches can be fobbed off by "concerned" interviews with Thatcher or as the last one was sheer contempt. But this? in vivid technicolour Marx's Class Warfare! No blitz Spirit" here as Heath and Co hoped for and certainly not humbled a humiliated peasants as Joseph Whitelaw and Co expected.

Listen to them talk, the figures don't concern them neither does the misery - The horror for them is that the Police LOST!

They want "tougher" measures, not solutions. When these are achieved the pumelling will begin again. The chance to turn their dreams into their fathers realities.
