

The Fun Won't Stop!

Anarchism is a rejection of the state, hierarchy and monopoly.

Anarchists are opposed to domination of one individual over another and so are

- naturally drawn towards
- class struggles, anti-capitalism, anti-monarchist
- and feminist struggles.
- Many anarchists make the association between oppression of people and oppression of the natural world and therefore support ecological or environmentalist ideas.

Lenton Anarchist Forum is an open forum for the discussion of all aspects of the anarchist tradition.

EAT THE RICH!

Lenton Anarchist Forum meets every Thursday at the CROCUS CAFÉ in Lenton (www.thecrocus.co.uk), 7-10pm

Young anarchist killed by the police in Bogotá - taken from www.indymedia.org

Today the doctors announced the death of Nicolás David Neira Alvares, a 15 year old who was marching in the anarchist block the past 1st of May. Like never before in the past few years, many young people decided to come together to protest against capitalism. The huge demonstration which included union workers, farmers, students, unemployed people and activists, marched in a non-violent manner on one of the main streets of Bogotá. The demonstration not only remembered those who were killed by the State in Chicago, but also denounced the current precarious economical and social conditions of Colombia, demanded a halt to the Free Trade Treatise and made public the atrocities that are being committed by the current fascist government. Atrocities that also occurred this day when the ESMAD (police) started to throw tear gas without any reason, and after one explosion, initiated a violent repression hitting the protesters with wooden sticks and rubber bullets. It was precisely during this repression that various people were severely injured, including Nicolás who was beaten up on the head by the police until he lost consciousness. Approximately 8 policemen surrounded Nicolás and covered themselves with masks impeding the remaining protesters to see their faces and to rescue him from their hands.

After sometime, Nicolás was finally taken by some comrades to a Hospital in the westside of Bogotá. There he waited for some hours until he was taken to the Salud Coop Hospital where he remained in critical conditions until today.

During this week, many people tried to denounce the situation, writing articles in the alternative media, helping the family, organizing a public sue and protesting in the streets. It is now known that many of these persons are being harassed by the police. Right now the media are covering the whole affair by trying to hide the real facts. The ESMAD are saying that they never beat the protesters.

The sad death of Nicolás and the violent repression done by the police is the consequence of this unjust system that seeks to silence all those voices that are trying to create a world of freedom and equality. All this information must be urgently known and divulged. We don't want to stay silent.

The above article is taken from the international Indymedia website. I've included it not only because I think it's shocking and a clear reminder of how harsh the state can be, but because ~~it~~ it had a real effect on me by reminding me exactly what Mayday is about. I know we were busy this Mayday with exam and the Critical Mass just before, but Mayday is the anniversary of the Haymarket murder and marking it with some form of protest should not be a matter of choice, but rather obligation. I personally think we should organize something for next year to keep the anarchist cause in the public eye, and demonstrate our solidarity with all the anarchist struggles worldwide, especially with those in Columbia who are currently grieving as well as revolting.

We've been talking for a while about having some kind of publication, or perhaps a slight creative version. minutes to go along with the Anarchist forum meetings. This is just one idea of what such a thing might look like. Wietse has helped me produce this, and a lot of the style is down to him, influenced by dutch squatting zines. This is in no way a suggestion of how future ones should look.

Actually venture outside of Denton and what do you find? Astoundingly, everybody is not burgling, mugging and stabbing everyone else. Nobody is trudging endlessly back and forth to lectures complaining about how hard they have it with all these coursework deadlines. People are enjoy the kind of culture that didn't get cloned and shipped in from London on a wave of lottery funding, the kind of culture you get when a lot of people live in the same place and try and do the best with their lives. And yes you find drugs and violence in this strange new world, but that isn't what the city is about, it's a symptom of the people in charge selling a whole city down the Trent for the sake of a good review in some American guide book. So my message to all students is this, next time a couple of thugs nick your wallet in an ill-lit street after dark, consider for a moment that those two thugs are just taking back a tiny piece of what was taken from them. And if you're honest, it didn't make a great deal of difference to you did it?
